

A11: Presentation

1 Product presentation

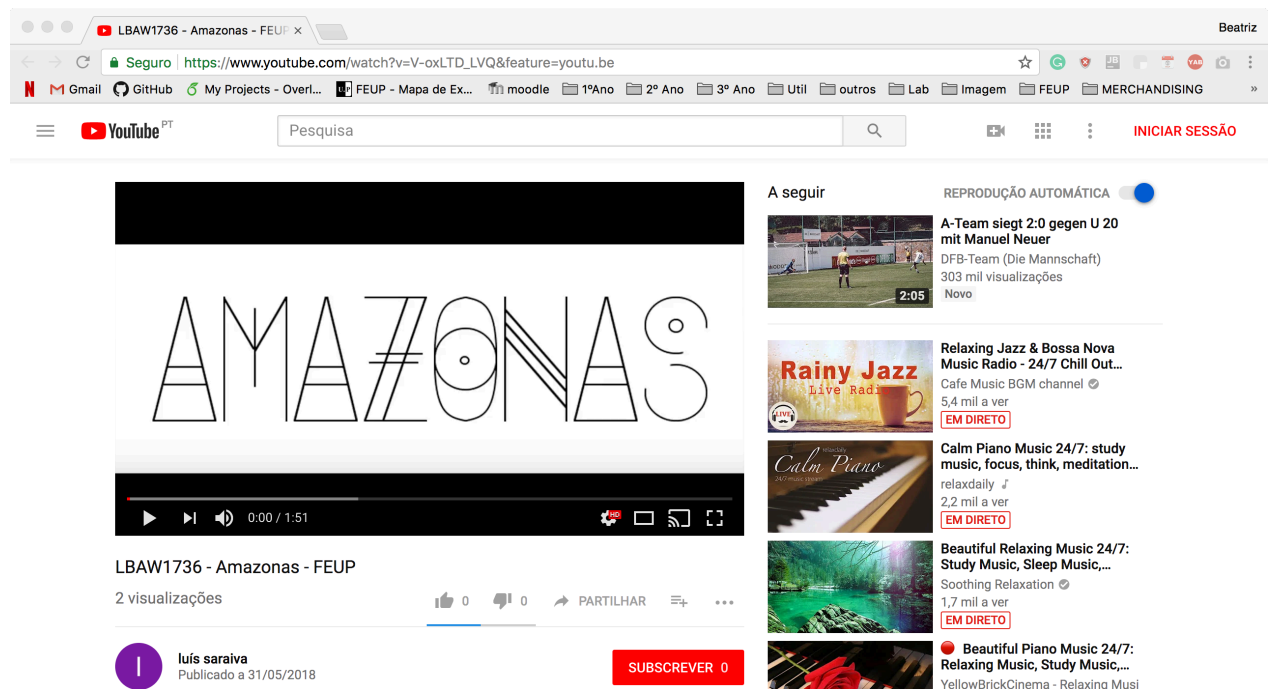

Our project features an information system capable of supporting an online store, which allows users to buy products from a wide range of categories. An user is allowed to search for products and see the informations of each product.

Authenticated users are permitted to add and remove products to their wishlist and cart, contact a member of our Support team and buy the products that he has in the cart. Users can authenticate with their Google account or with our authentication form in website.

Our team is divided in three, the Administration, the Support and the Brand Managers. The Administration bans users and confirms the purchases done by the users. The Support responds to the messages that are sent by the users. The Brand Managers can add, delete and remove products, the members of the Administration are also Brand Managers.
